Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

NEW ABSTRACT

The technical features mentioned in the abstract do not include a reference sign between parentheses (PCT Rule 8.1(d)).

Provided herein are exemplary techniques for visualizing patterns of changes and behavior on a compute infrastructure composed of abstracted network elements and entities (Figure 10). A Differential View interface provides for complete visualization of infrastructure change and behavior for specific network elements/entities, groups of said elemenets/entities, or the system as a whole. That is, this interface further provides interactive filters that identify and display patterns of change and behavior of said elements and entities, on a graduated scale, for the compute infrastructure, as a whole, for specific groups, and individual entities within the infrastructure.
